ORDER:

The Chief Engineer (R&B) CRN & MD, APRDC, Hyd., has stated that Guntur – Parchoor road is an important S.H. Connecting number of villages in Prathipadu and Pedanadipadu mandals and connects several other roads to Prakasham District. Most of the Agricultural produce is transported through this road to near by markets at Prathipadu, Ponnur and Guntur. Most of the cotton and Mirchi Lorries fly on this road.

2. He has also stated that the existing bridge wing walls were collapsed during 2005 floods. The irrigation Dept., has widened existing drain width from 70 m to 134 m. Due to widening and Deeping of the drain the abutments are damaged and cracks developed at several places. Pier cap (pier no.3) concrete is crushed below bed block. Well caps and wells were also exposed due to deepening of the bed. At present, the movement of traffic is restricted to half way at approaches on either side of the Bridge. In view of the existing damaged condition of the bridge, it is necessary to Re-construct HLB to avoid the inconvenience for movement of traffic and allow maximum discharge of flood water to avoid damage the Bridge.
